

Name _____

Date _____

Local address (where you will be coming from to attend your clinical practicum - home or campus address) _____

Information Sheet for planning Phlebotomy Clinical Practicum

Complete the following questionnaire; include it with your immunization/records- THANKS!

NOTE: phlebotomy practicums typically run Tuesday through Friday for 2 weeks. We are planning for several separate rotation periods throughout the semester, and we plan to schedule each student for one (1) 2-week rotation period to attend.

Mark/complete all applicable responses:

YES NO I have a car.

If YES, I can take _____ students (TOTAL Number **INCLUDING DRIVER**).

YES NO I need to be in a carpool.

YES NO My family member will be driving me.

Orientation for some practicums will take place on the first day of rotation. However, students completing a clinical practicum at some of the hospitals will have orientation as a group BEFORE rotations begin. - Please add comments below indicating non-MMSC courses you are taking and the weekday schedule (days/times) that they are scheduled. NOTE: Orientation may conflict with a work schedule beyond my control.

IF you have children AND have special scheduling needs based upon this fact, please indicate those here. Please understand that for the rotation period, all rotations are taking place in the early morning for approximately a 2-week period.

OTHER COMMENTS/EXTENUATING CIRCUMSTANCES:

I understand that the Phlebotomy Instructor will take these details into consideration, but will have to prepare a schedule appropriate for ALL students AND the clinical affiliates as necessary.

Student Signature _____ Please note that this is subject to change pending current pandemic restrictions.
